## Shift Supervisor Position Description

Employer Name: Ag Energy Resources, Inc.

Position: Shift Supervisor

Department: Plant Operations

Description: Ag Energy Resources is seeking a Shift Supervisor to work at our Benton, IL ethanol facility.

### Responsibilities:

- The Shift Supervisor will report to the General Manger and is responsible for managing all maintenance activities and processes within the facility.
- Defines the scope, criteria and priorities for plant predictive and preventive maintenance to achieve department, plant and company goals.
- Ensures budgeted uptime for the plant machinery and equipment by efficiently performing preventive, predictive and corrective maintenance activity while controlling costs through variance analysis from the cumulative budget compared to actual costs.
- Evaluates the performance of employees using pre-established goals and objectives of the department and company.
- Manages the equipment and parts inventory controls to ensure that resources are available to accomplish the overall plant and maintenance objectives.
- Evaluates equipment maintenance, operations and facilities upkeep needs in order to ensure minimal down time and establish corrective plans if variances are detected.
- Participates in the development of plant level strategies and is accountable for tactical execution and achievement of plant performance, safety, environmental and quality objectives.

Location: Benton Facility

State: Illinois

Country: U.S.A.

### Requirements:

- High School Diploma, AAS preferred
- Qualities and characteristics we seek include: demonstrated leadership skills, solid character, common sense, good business acumen, a positive attitude, good judgment, sensitivity to quality, the ability to create "best practices" for processes and procedures as well as a stable personal and professional history.

Education: High School Diploma, AAS preferred
